

# IDC® POWERHARNESS

## PICTOGRAM GUIDE

size 0-4

a=e<sub>m</sub>-m-h<sub>m</sub>

The dog – canis lupus familiaris

Innova Dog Comfort

### WATER REPELLENT COVER

### FLASHLIGHT HOLDER

The flashlight holder is made of elastic material. Due to this, it can hold various sizes of flashlights. Made of high quality German materials. It can be used simultaneously with the side bags. It's essential for search and rescue dogs and service dogs for working during the night.

### SIDE BAG FIXING OPTION

Side bags are available in 3L and 4L versions for the bigger Powerharness, sizes from 0 to 4. A smaller IDC® Universal side bag has also been available since 2013. With a 250cm<sup>3</sup> capacity, it's ideal for carrying documents, vaccination papers, cellphones and dog treats. Julius-K9® invention 2002

### REFLECTIVE EDGES AND CHEST STRAP

One of the most important functions of the IDC®-Powerharness is that it works well also as a visibility vest. The grey line of the chest strap and the edges of the harness are made of reflective materials to help keep your dog visible when out walking in the dark, even from a great distance.

### PERFECT ERGONOMICS

The chest strap is positioned across the sternum of the dog. This way it distributes pressure over the chest area. The benefit of it is that instead of its neck, the dog's chest muscles bear the weight of your pull. Julius-K9® invention 2009

### LUMINOUS, REMOVABLE PATCH

With Julius-K9® logo. Julius-K9® invention 2009

### CLOSABLE HANDLE

### IDC® HANDLE LOCK

The handle fixing / covering option of the IDC®-Powerharness allows 4 combinations. You can fix only the steel ring, only the handle, both of them, or none of them. With these, you can minimize the dog's chances of being blocked. It's really important especially for hunting and search and rescue dogs. NOTE: If the dog is blocked by the bushes the IDC®-Powerharness allows the dog to move backwards easily, so the dog can escape. Julius-K9® invention 2009

### BREATHABLE, SKIN FRIENDLY INNER LINER

Unfairly, we don't pay enough attention to these great features. The OEKO-TEX® material is manufactured to the highest international standards.

### HEAVY DUTY BUCKLES

The high-quality buckles of the IDC®-Powerharnesses are fully tested and checked. This careful attention is of great significance, especially during wintertime, as the buckles work perfectly and don't break even in frosty weather. Made by Julius-K9®

### AVAILABLE WITH SAFETY LOCK

AVAILABLE WITH SAFETY LOCK IN BLACK COLOR We offer IDC® Powerharnesses with safety locks, these products are designed for enhanced safety. The hook & loop mounting safety lock was developed by Julius-K9® in 2004, chiefly designed for service dogs. This practical accessory increases the load-bearing capacity of the buckle under the chest by 60 kg. It ensures safe use even in case of damaged (chewed) buckles. It has been in use by the City of London Police Dog Unit since 2013
